

How to Measure Your Existing Board

Please remember that Marsh's Retro-Fit Markerboards are custom-made for you, making them non-returnable. We ask that you please be very precise when measuring your existing boards. Here are a few simple tips to make sure you have an accurate measurement before placing your order:

If you wish to cover your current frame, AND its depth (the distance it sticks out from the board's surface) is less than 1/2":

- Measure the width of your board including the frame.
- Measure the height of your board including the frame, but excluding chalk or marker trays.

To keep your current frame, OR if the frame's depth (the distance it sticks out from the board's surface) is greater than 1/2", measure the width and height of your board excluding the frame.

Once you have the exact dimensions for your Retro-Fit Markerboard, or if you still have questions, just give our friendly sales team a call at 1-800-260-2776. We're always happy to help you find what you need.
