About this space

Art Room

Elementary School

The art room for elementary school is equipped with furniture that's flexible enough to accommodate everything from sketching, drawing, and painting, to vinyl cutting, clay sculpture, and more. Art tables and seating adjust in height and angle, so students can work in whatever position best suits their project. Storage units make it easy for students to find art supplies, and utility tables store materials for upcoming projects.

Requirements for a Great Art Room

For **students**, the art room should provide easy access to art materials and tools. Flexible workspaces should accommodate independent and small group work.

For **teachers**, the art room should feature open walkways, making it easy to observe students as they work and to offer assistance as needed. Ample storage should be available for in-progress projects, media, tools, and other art supplies.

For **administrators**, the art room should be furnished in a way that meets the needs of their school's art program. Products must be readily available and delivered on time. Installation should be quick and efficient

Art Room Solutions from School Outfitters

School Outfitters' research and development team designed an art room that caters to the needs of students and teachers alike. We've selected flexible furnishings that can be arranged and adjusted to accommodate a wide variety of art projects. A dedicated **project area**, **staging and display area** and **storage and clean-up area** make creating a great art room simple.

The **project area** was designed to assist teachers and students in creating a space that accommodates independent and small group projects.

- Adjustable-height **art tables** feature adjustable legs, so students of various sizes can work at a comfortable height. Spacious tabletops let students spread out materials and the thick laminate won't absorb materials like paint, dye or clay residue. Smooth, non-textured surfaces make it easy to draw or mold clay.
- **Art stools** give students freedom of movement as they focus on their projects, and the backless seats promote good posture and strengthen core muscles.
- **Mobile storage carts** can be rolled directly to student workstations, making distributing and collecting supplies easy. Clear bins make it simple to locate needed materials, and they can be completely removed from the unit for use at workstations. Large and small bin sizes accommodate a variety of storage needs.

The **staging and display area** provides students with a consistent location where they can access information about upcoming projects or store their in-progress projects.

- Broad **utility tables** can be used to lay out materials and information for upcoming projects. They may also be used as a place to store paintings as they dry, or to display in-progress or finished projects.
- A **bulletin board** gives teachers a place to post reminders and information about projects or upcoming class activities.
- A **dry erase board** makes it easy for teachers to communicate instructions or examples to the whole class. Students may opt to use the dry erase board to brainstorm ideas for a project.

The **storage and clean-up area** keeps the classroom organized, so students and teachers can quickly access supplies and materials without consuming much class time.

- A lockable **storage cabinet** secures supplies and materials that may require teacher supervision. Locking items away also reduces distractions by keeping tools, supplies and projects out of view. Teachers may also opt to use this cabinet for securing personal belongings.
- **Open shelving** provides storage for supplies that need to remain in a consistent place. Open shelving may also be used to display finished projects.
- A **utility cart** can be rolled directly to students, making distributing and collecting supplies easy. Built-in paper slots make it easy to transfer wet paintings to the drying rack.
- **Wall-mounted storage** provides additional space for supplies, materials and in-progress or complete projects. Locking doors give teachers the option to secure the items inside if needed.
- **Rack storage** provides a space where wet paintings can be stored as they dry. The upright design saves space in the classroom.
- A **portable sink** allows students to quickly wash their hands, rinse out paint cups and clean brushes during clean-up time.

Choosing your Art Room Solution
