

Assembly Area

Elementary School

The assembly area for elementary school ensures student performances and special programs go off without a hitch. A spacious portable stage can be quickly set up for student performances, and easily moved out of the way and stored when it's not needed. Stackable folding chairs are easy to set up and arrange in neat rows, and their padded seats keep students comfortable as they watch assemblies or school programs. AV equipment such as a digital projector, low-glare screen, microphones and a PA system ensure everything needed for school presentations remains close at hand.

Requirements for a Great Assembly Area

For **students**, the assembly area should provide comfortable seating, ensuring their focus remains on the performance or program being presented. The portable stage should be easily accessible and equipped with rails for maximum safety during student performances.

For **teachers**, the best assembly area should feature a portable stage that can be quickly and efficiently assembled and disassembled as needed. Chair should be lightweight and stackable for easy storage. They should be able to effortlessly move through the seating rows so they can keep an eye on all the students in the room.

For **administrators**, the assembly area should be furnished in a way that meets the needs of their school. Products must be readily available and delivered on time. Installation should be quick and efficient.

Assembly Area Solutions from School Outfitters

School Outfitters' research and development team designed an assembly area that caters to the needs of students and teachers alike. We've selected furnishings that ensure the comfort and safety of students and can also be set up and stored away as needed. A dedicated **student seating area**, **presentation area** and **AV equipment area** make creating a great assembly area simple.

The **student seating area** is designed to ensure all students can comfortably watch school performances, presentations or special events.

- **Metal folding chairs** are lightweight and easy to move, making them a breeze to set up, fold and store away as needed. The contoured seat and curved back offer extra comfort to keep students comfortable as they watch assemblies.
- A **folding chair dolly** supports several rows of stacked chairs, making set up and clean up simple. Sturdy, rolling casters easily move over any flooring.
- **Seating circles** offer cozy floor seating for young children. Seating circles help save space during a busy event, as the students seated in chairs can easily see over those seated on the floor.

The **presentation area** features the equipment that special guests, performers or speakers need for a successful assembly.

- A **portable stage** is easy to assemble and can be quickly taken down and stored away again when it's not needed. Its raised height ensures the watching students have a clear view of the speaker or performer.
- **Stage skirting** gives the portable stage a finished look and may be used to reduce distractions by hiding AV equipment, wires, or cables.
- A speaker's **podium** keeps students' attention centered on the speaker. A built-in microphone ensures the speaker is easily heard, and an angled top with paper ledge allows the speaker to refer to a set of notes if needed.
- A **microphone** and **sound system** allow speakers to be easily heard and seen as they move around the portable stage.
- **Folding tables** can be used to store trophies, awards or props for the ongoing presentation or special event. Their folding design makes them easy to set up and store away.

AV equipment ensures speakers, presenters and special guests are easy to see and hear by all students in the assembly area.

- A **digital projector** featuring high-brightness capability displays crisp, clear images over a long distance.
- A **projector screen** with a matte surface reduces glare, making it easy for assembly participants to view presentations, images or videos.
- **Microphone stands** hold microphones, allowing the speaker to keep their hands free as they lecture, present or perform.
- **Cordless microphones** give special guests the freedom to traverse the stage as they speak.

- A good **PA system** ensures everyone in the assembly area can hear speakers and performers. A portable design makes it easy to set up in whatever area of the room is most convenient.
- **Flat panel carts** make it easy for school faculty to move AV equipment around as needed. They may also be used set up and hold screens and monitors for simulcast presentations.
