About this space

Digital Media Center—Middle & High School

A digital media center encourages students to explore audio and visual equipment, graphic design and animation software and more. Incorporating both collaborative tables and technology tables lets students move between spacious tabletops for collaborative planning, group discussions or independent or small-group digital work. Mobile whiteboards can be used for brainstorming or as temporary partitions between groups.

Requirements for a Great Digital Media Center

For **students**, the digital media center should give students access to technology, software and AV equipment, as well as spacious tabletops with comfortable seating they can use for group work and planning sessions.

For **teachers**, the best digital media center should feature open walkways, so they can easily move from one student group to another. Mobile writing surfaces make presenting material or information easy and can also be used to section off workspaces.

For **administrators**, the digital media center should be furnished in a way that meets all the needs of their school. Products must be readily available and delivered on time. Installation should be quick and efficient.

Digital Media Center Solutions from School Outfitters

School Outfitters' research and development team designed a digital media center that caters to the needs of students and teachers alike. We've selected furnishings that accommodate the use of technology and AV equipment as well as collaborative work or project planning sessions. Dedicated **technology areas**, **collaboration areas**, and **mobile storage equipment** make creating a great digital media center simple.

Technology areas make it easy for students to access and use devices in the classroom.

- **Mobile computer tables**
- **Mobile chairs**

Mobile computer tables keep devices powered and feature grommets to keep cables out of the way. Rolling casters make it easy for students to arrange the tables into groups.

Mobile school chairs are constructed from durable, reinforced plastic that supports students as they lean back. The smooth, anti-static seats don't require a metal backrest, which means students won't snag hair or clothing on exposed rivets. Rolling casters makes it easy for students to move them around the room.

Collaboration areas were designed to allow students to easily arrange themselves in ways that help them interact effectively.

- **Collaborative tables**
- **Mobile seating**
- **Mobile dry erase easels**

Collaborative tables feature spacious work surfaces that are still compact enough to allow team members to reach the materials they need for their activities. The table shapes are designed to let all students see each other, giving everyone an

equal opportunity to participate. Thick tabletops withstand heavy use, and laminate surfaces clean easily.

Mobile seating allows students to easily arrange themselves into the configurations that best fit group projects.

Mobile dry erase easels can be easily rolled to workstations, so students can brainstorm and capture ideas on the fly. Two writing surfaces let students brainstorm on one side and present finished ideas on the reverse side. Easels can also be used to section off workspaces if needed.

Mobile storage equipment makes distributing and collecting classroom supplies quick and easy.

- **Mobile bin storage**
- **Mobile charging carts**

Mobile bin storage can be rolled directly to collaboration stations, making distribution and collection of supplies easy. Clear bins make it simple to locate materials, and they can be completely removed from the unit for use at workstations. Large and small bin sizes accommodate a variety of storage needs.

Mobile charging carts keep all your classroom devices charged and ready for use. Locking doors keep them secure overnight. Heavy-duty rolling casters easily maneuver over any flooring, and the top doubles as an additional surface for storage or presentation.

Choosing your Digital Media Center Solution

School Outfitters makes it simple to outfit your school's digital media center. Choose the option that best fits your budget and needs and get an itemized quote with just one click, including all three of our specially-designed solutions.
