About this space

Digital Studio—Elementary School

A digital studio center introduces elementary school students to audio visual equipment, cameras, and even graphic design and animation software. Incorporating both collaborative tables and technology tables lets students move between spacious tabletops for collaborative planning or group discussions and technology tables for independent or small-group digital work. Mobile whiteboards can be used for brainstorming, or as temporary partitions between groups.

Requirements for a Great Digital Studio

For **students**, the digital studio should give students access to technology, software and AV equipment, as well as spacious tabletops with comfortable seating they can use for group work and planning sessions.

For **teachers**, the best digital studio should feature open walkways, so they can easily move from one student group to another. Mobile writing surfaces make presenting material or information easy and can also be used to section off workspaces.

For **administrators**, the digital studio should be furnished in a way that meets all the needs of their school. Products must be readily available and delivered on time. Installation should be quick and efficient.

Digital Studio Solutions from School Outfitters

School Outfitters' research and development team designed a digital studio that caters to the needs of students and teachers alike. We've selected furnishings that accommodate the use of technology and AV equipment as well as collaborative work or project planning sessions. Dedicated **technology areas**, **collaboration areas** and **mobile storage equipment** make a creating a great digital studio simple.

Technology areas make it easy for students to access and use devices in the classroom.

- **Mobile computer tables**
- **Mobile seating**

Mobile computer tables keep devices powered and feature grommets to keep cables out of the way. Rolling casters make it easy for students to arrange the tables into groups.

Mobile seating options include chairs that students and easily roll into place or stools that they can easily pick up and take wherever they are needed.

Collaboration areas were designed to allow students to easily arrange themselves in ways that help them interact with each other effectively.

- **Collaborative tables**
- **Mobile seating**
- **Mobile dry erase easels**

Collaborative tables feature spacious work surfaces that are still compact enough to allow team members to reach the materials they need for their activities. The table shapes are designed to let all students see each other, giving everyone an equal opportunity to participate. Thick tabletops withstand heavy use, and laminate surfaces clean easily.

Mobile seating options include chairs that students and easily roll into place or stools that they can easily pick up and

take wherever they are needed.

Mobile dry erase easels can be easily rolled to workstations, so students can brainstorm and capture ideas on the fly. Two writing surfaces let students brainstorm on one side and present finished ideas on the reverse side. Easels can also be used to section off workspaces if needed.

Mobile storage equipment makes distributing and collecting classroom supplies quick and easy.

- **Mobile bin storage**
- **Mobile charging carts**

Mobile bin storage can be rolled directly to collaboration stations, making distribution and collection of supplies easy. Clear bins make it simple to locate materials, and they can be completely removed from the unit for use at workstations. Large and small bin sizes accommodate a variety of storage needs.

Mobile charging carts keep all your classroom devices charged and ready for use. Locking doors keep them secure overnight. Heavy-duty rolling casters easily maneuver over any flooring, and the top doubles as an additional surface for storage or presentation.
