

Drawing & Painting (Art Room)

Middle School and High School

The drawing and painting classroom for middle school and high school were designed for two-dimensional artwork such as sketching, drawing, and painting. Drawing tables that adjust in height and angle make it easy for students to work in whatever position best suits their project. They also ensure students remain in a comfortable position as they look back and forth between subject models and their drawing or painting surface. Storage units make it easy for students to find art supplies, and utility tables store materials for upcoming projects.

Requirements for a Great Drawing and Painting Classroom

For **students**, the drawing and painting classroom should provide easy access to art materials and tools. Workspaces should be adjustable, so students can remain in ergonomically friendly positions as they look between subject models and their drawing or painting canvas.

For **teachers**, the drawing and painting classroom should feature open walkways, making it easy to observe students as they work and to offer assistance as needed. Ample storage should be available for in-progress projects, media, tools, and other art supplies.

For **administrators**, the drawing and painting classroom should be furnished in a way that meets the needs of their school's art program. Products must be readily available and delivered on time. Installation should be quick and efficient.

Drawing and Painting Classroom Solutions from School Outfitters

School Outfitters' research and development team designed a drawing and painting classroom that caters to the needs of students and teachers alike. We've selected ergonomic furnishings that ensure students remain comfortable as they draw and paint, and a variety of storage options to keep the classroom organized. A dedicated **project area**, **staging and display area** and **storage and clean-up area** make creating a great drawing and painting classroom simple.

The **project area** was designed to assist teachers and students in creating a space that accommodates independent and small group projects.

- **Drawing tables** adjust in both height and angle, allowing students to work in whatever position is most comfortable to them and ensuring they have a clear view of their subject model. Built-in media storage allows students to keep pencils, charcoal, or paints close at hand.
- **Art stools** give students freedom of movement as they focus on their projects, and the backless seats promote good posture and strengthen core muscles.
- **Mobile storage carts** can be rolled directly to student workstations, making distributing and collecting supplies easy. Clear bins make it simple to locate needed materials, and they can be completely removed from the unit for use at workstations. Large and small bin sizes accommodate a variety of storage needs.

The **staging and display area** provides students with a consistent location where they can access information about upcoming projects or store their in-progress projects.

- Broad **utility tables** can be used to lay out materials and information for upcoming projects. They may also be used as a place to store in-progress or display finished projects.
- A **bulletin board** gives teachers a place to post reminders and information about projects or upcoming class activities.
- A **dry erase board** makes it easy for teachers to communicate instructions or examples to the whole class. Students may opt to use the dry erase board to brainstorm ideas for a project.

The **storage and clean-up area** keeps the classroom organized, so students and teachers can quickly access supplies and materials without consuming much class time.

- A lockable **storage cabinet** secures supplies and materials that may require teacher supervision. Locking items away also reduces distractions by keeping tools, supplies and projects out of view. Teachers may also opt to use this cabinet for securing personal belongings.
- **Open shelving** provides storage for supplies that need to remain in a consistent place. Open shelving may also be used to display finished projects.
- **Wall-mounted storage** provides additional space for supplies, materials and in-progress or complete projects. Locking doors give teachers the option to secure the items inside if needed.
- **Rack storage** provides a space where wet paintings can be stored as they dry. The upright design saves space in the classroom.
- A **portable sink** allows students to quickly wash their hands and clean their brushes and paint pallets after use.

Choosing your Drawing and Painting Classroom Solution
