About this space

Video Creation Space—Middle School

A video creation space in your school's makerspace allows students to experience everything from writing and drafting, to acting, filming, editing, sound engineering and more. Collaborative tables give students room to work on storyboards or plan projects, and technology tables offer a space for digital work. Flexible seating let's students easily arrange themselves into groups and a large, open area make it easy to use AV equipment or set up a green screen.

Requirements for a Great Video Creation Space

For **students**, the video creation space should give students access to technology, software and AV equipment, as well as spacious tabletops with comfortable seating they can use for group work and planning sessions. Open space should be available for filming or rehearsals.

For **teachers**, the video creation space should feature open walkways, so they can easily move from one student group to another. Spacious work areas should be available for students to use while writing or planning. Ample storage keeps AV equipment and other supplies secure and organized.

For **administrators**, the video creation space should be furnished to meet the goal of their facility. Products must be readily available and delivered on time. Installation should be quick and efficient.

Video Creation Space Solutions from School Outfitters

School Outfitters' research and development team designed a video creation space that caters to the needs of students and teachers alike. We've selected furnishings that accommodate the use of technology and AV equipment as well as collaborative work or planning sessions. **Videography workstations** and **equipment storage** facilitate creative work.

Videography Workstations equip students for video capture and digital editing projects. This area includes:

- **Mobile tables**
- **Mobile seating**
- **Mobile dry erase boards**

Mobile tables seat several students for planning and editing sessions but can be easily moved out of the way to make room for videography equipment. These tables can also serve as an anchor desk in student newscasts or interviews. Sturdy tabletops hold cameras, microphones or props as needed.

Mobile seating is easy to move around the room and can be quickly pushed out-of-the-way when filming.

Mobile dry erase easels can be moved to student planning areas for brainstorming sessions.

Mobile storage equipment makes it easy to move project supplies around the room. This area includes:

- **Mobile bin storage**
- **Open shelving**

- **Lockable storage**
- **Mobile charging carts**

Mobile bin storage keeps lenses, filters and other videography supplies organized. Plastic bins can be removed from the cart for use at student workstations.

Open shelving organizes larger equipment and props.

Lockable storage secures expensive equipment or items that require teacher supervision.

Mobile charging carts keep classroom devices secure and ready for use. Rolling casters make it easy to move the cart around the room and a textures surface provides students with an extra workspace for cameras and other recording equipment.

Choosing your Video Creation Space Solution

School Outfitters makes it simple to outfit your school's video creation space. Choose the option that best fits your budget and needs and get an itemized quote with just one click, including all three of our specially-designed solutions.
